

## Intumescent gaskets for DES family

### FEATURES

- Intumescent gaskets for fire barrier
- In compliance with EN1363-1 and EN45545-3
- **Direct installation on DES Frames**
- Cost effective and can be ordered separately from the frames

GKD series intumescent gaskets are used with DES, DES 24M frames for fire protection according to EN1363-1 and EN45545-3.

They consist of a flexible, intumescent material that expands under pressure with thermal influence. In the event of a fire, foam forms and a solid, pressure resistant wall is created.

**Material:** graphite-based intumescent material
