

SPL M

Large multiple grommets for cables without connectors – double membrane

FEATURES

- Multiple grommets for high number of cables without connectors
- Grey and black colours available
- UL94-V0 for both colors
- Strain relief according to EN 62444

The SPL M rubber grommets allow many non-terminated cables to be routed through the OSF 50/63 and the DES CLICK Family frames, saving a lot of space compared to the conventional cable glands. After having slightly perforated the front membrane, the cable of the required dimensions is pushed through the wall where the second membrane allows a perfect mechanical and fluidic seal.

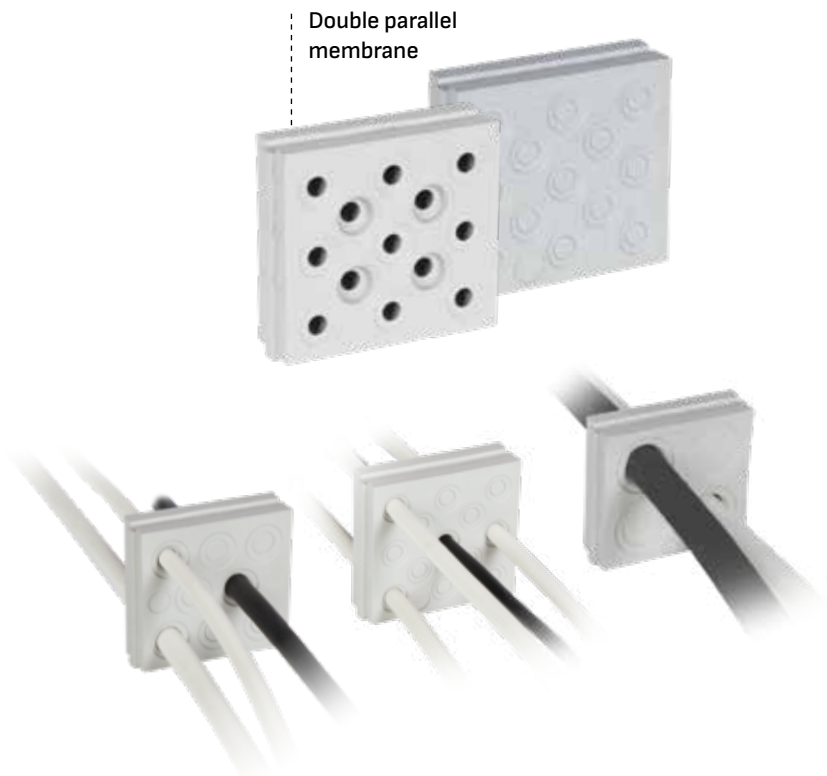

Material: TPE, halogens and silicones free

Flammability: self-extinguishing acc. to UL94-V0 (grey or black)

Temperature: -40°C... +110°C (static)
